

YOUR FAST LANE TO AVIATION DATA MANAGEMENT

horyzon

Welcome to Horyzon

YOUR FAST LANE TO AVIATION DATA MANAGEMENT

Horyzon is a sophisticated data management tool, developed together with aviation and industry experts. It enables companies to streamline their processes, structures their document control system, and increases their efficiency, resulting in tremendous time and cost savings.

A WEB-BASED SOFTWARE TOOL DEVELOPED FOR EASA PART-21 DESIGN AND PRODUCTION ORGANISATIONS

Horyzon comprises useful features and processes that support an efficient customer, supplier and project administration as well as comprehensive, parts, document and drawing control and management features.

With its unique modular structure, the software can be customized to your individual procedures and can be easily adapted to any company structures.

The aviation specific features, user roles/permissions and automated processes satisfy the regulatory requirements for EASA Part-21 approved design and production organisations, the unique selling point that distinguishes the Horyzon software from other products.

Why Horyzon?

EIGHT ARGUMENTS THAT HELP YOU SAVE TIME & MONEY

1. TURNKEY SOLUTION – ADAPTABLE TO YOUR PROCESSES

Customers can use and deploy the Horyzon turnkey software solution immediately upon takeover without further effort.

→ YOUR ADVANTAGE

To implement Horyzon, you do not have to change your current processes. Horyzon can be adapted to your processes immediately.

2. WEB BASED - ALWAYS AVAILABLE, ANYWHERE

The Horyzon web interface accesses the server remotely. Whether via PC, tablet or mobile phone, on the road or stationary in the office.

→ YOUR ADVANTAGE

With Horyzon you are well connected everywhere and anytime.

3. ALWAYS UP TO DATE

All users work with up-to date data through the centralized software tool supporting real time cooperation on projects and files with your entire team.

→ YOUR ADVANTAGE

Intelligent project management and efficient teamwork in one hand.

**WE HELP YOU
TO GET RID OF
INEFFICIENT
WORKFLOWS**

HORYZON SAVES PRECIOUS TIME AND INCREASES YOUR PRODUCTIVITY

4. SIMPLE AND INTUITIVE USER INTERFACE

The clearly designed modular software allows for user-friendly handling. Structured filter options facilitate your search and navigation through the Horyzon tool.

→ YOUR ADVANTAGE

Easy navigation and fast adaptation.

5. YOUR DAILY AID

Horyzon supports your daily business in any respect. From the proposal and order confirmation through customer & project administration, supplier management up to document processing and invoicing – everything can be done with a mouse-click.

→ YOUR ADVANTAGE

Efficient operation by the combination of several tools within Horyzon will increase your productivity and will save you valuable time.

6. EASA PART-21 COMPLIANT RELEASE PROCESS

The automated document and drawing creation, release and revision processes are compliant to EASA Part-21 standards and support GDPR conform digital signatures. Pre-defined DOA and POA specific signees get automatic notifications whenever actions are to be taken.

→ YOUR ADVANTAGE

Use of outdated templates is not possible. No more copy-paste of templates or time-consuming manual signatures. Boost your efficiency.

7. SECURE WEB-HOSTING OR LOCAL INSTALLATION

We offer secure web-hosting packages including full back-up or installation on your local server (licence based). Horyzon works with any standard server environment and enables back-up data access even in case of failure. Customer support during operating hours is provided at no extra cost.

→ YOUR ADVANTAGE

Use your existing server infrastructure or get the full-web hosting package out of one hand.

8. YOUR TIME IS PRECIOUS

From our different licence models, you choose the one that is most efficient for you. The software will pay off in the first month of its usage due to the tremendous time savings in your daily operations.

→ YOUR ADVANTAGE

Horyzon will help you streamline your processes and to save time and money immediately.

FEATURES THAT WILL MAKE YOUR EVERYDAY LIFE EASIER

COMPANIES

A comprehensive customer and supplier management allows you to administrate addresses and contact persons, assign specific customer/supplier numbers and many other features. Also the entire supplier evaluation and control inclusive audit documentation, contracts etc. are managed with this module.

PROJECTS

New projects, including the associated folder structure, are created with just one mouse-click and assigned to customers automatically. Classify projects, assign the project team and individual responsibilities, manage your project milestones and due dates. The module provides a complete project overview and allows you to create and manage all project related documentation (internal/external documents, drawings, parts etc.).

DOCUMENTS

A standardized document management and control system is essential for an effective project development. Create new documents within seconds choosing from different customized templates that are stored automatically in the associated project folders. Intuitive filters provide effective search and navigation possibilities through all files. Manage internal and external documents or files, inclusive an automated release and revision process. The module also includes an EASA Part-21 compliant, fully automated release and revision process including change documentation.

DRAWINGS

A complete drawing administration tool providing full control over your design data. Create specific drawing types and link them with parts. It also comprises an EASA Part-21 compliant, fully automated release and revision protocol, including change classification and documentation.

RFP (REQUEST FOR PROPOSAL)

Keep your business running and effectively monitor and manage all your sales activities, customer requests, proposals and invoicing with this module. Automatically

create proposals, additional work claims, order confirmations, invoices etc. using the standardized user interface and templates. Define authorized signatories for the automated release protocol for commercial documents.

PARTS

Create and administrate all standard parts, single parts, assemblies and kits with this specific "Parts" module. Part Numbers are automatically assigned using customer defined part numbering methods. Automatic configuration management is provided for assemblies or kits.

AIRCRAFT TYPES

The module "Aircraft Types" is developed specifically for design organisations (DOAs). It includes the administration of various aircraft types & models, including a definition of the type certification basis that is used for changes and repairs.

MANUALS / HANDBOOKS

Manage your entire quality documentation (handbooks, procedures, processes etc.) through Horyzon. Provide a quick and simple read-only access for your staff with restricted functionalities to ensure compliance with the regulations. The module also includes a fully automated release and revision protocol including change documentation.

USER ADMINISTRATION

Set up all Horyzon user accounts and include specific user contact details. Allocate DOA, POA and other management specific user roles and permissions.

MASTER DATA

Offers full control of your standard document and drawing templates inclusive an EASA Part-21 conform, automated release and revision protocol. Define customized document numbering and saving directories in your folder structure for each file. Specify an individual approval process (check, approve and release) for all documents & drawings inclusive threshold values for commercial documents.

HOW YOU CURRENTLY WORK

- ✖ wasting resources searching for the right document templates, renaming and storing files
- ✖ tremendous time exposure to find files on servers
- ✖ making copy-paste-errors when doing repetitive documentation tasks
- ✖ losing track of your sales activities
- ✖ losing time with your manual check, release and revision process
- ✖ make dangerous mistakes with unclear document status & old revisions
- ✖ pay for expensive archiving systems and remote access

HOW YOU WILL PERFORM WITH HORYZON

- ✓ Horyzon knows your templates and your numbering system – it will create your files with a simple mouse click
- ✓ search via the intuitive Horyzon user interface and profit from a standardized folder structure
- ✓ with the automatic filling function, add the important data and do not think about formatting
- ✓ Horyzon will help keep track on your sales and guide you through creating requests, proposals, invoices, etc.
- ✓ your team members get real time notifications and can check and sign your data from any device
- ✓ get rid of uncontrolled copies and have your latest revisions at your fingertips
- ✓ access your data from anywhere, anytime on any device
