

Dear Reader,

welcome to the newest edition of our Newsletter providing insights, latest updates and future prospects of our company. We hope you enjoy reading and look forward to your response!

March 2023

We are thrilled to announce the successful completion of our first **Cabin STC project for Smartwings** in record time!

This project involved the modification of **B737-800s and B737-8s** with a very special configuration that includes 64 Business Class and 24 Economy Class seats.

This was a remarkable achievement for us. Our team's dedication, expertise, and collaborative approach allowed us to successfully execute this project, ensuring that Smartwings Airlines could offer a unique and luxurious experience to their passengers.

We are honored to have been entrusted with this project and grateful for the opportunity to showcase our expertise in cabin design and modification. This is just the beginning - we are excited to continue partnering with airlines to bring their vision for exceptional cabin experiences to life!

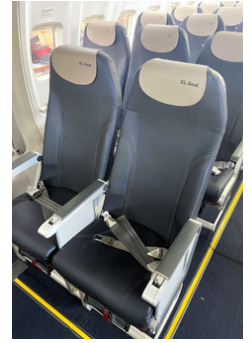

April 2023

The first completely refurbished **Condor B757 (D-ABOJ)** is taking-off with a brand new cabin interior made by Skytec Aerospace GmbH.

- New Seat-Covers
- New Carpet
- New Bulkhead Logos
- New Curtains
- New Literature Pockets
- New Placards

The new cabin products are not only visually appealing but also highly functional and providing a comfortable and enjoyable experience for their passengers!

We want to extend our thanks to the entire team from Condor and all our suppliers who supported us from the initial planning stages to the final installation.

May 2023

We've just picked up our first **prototype** of the **A32F Windscreen** from our suppliers. Its innovative attachment allows a 5 inch movement of the windscreen without any shipside modifications. The unique modern design features a special frameless viewing window meeting the direct view requirements by still providing sufficient privacy for the cabin crew. .
