Intro

# WE BUILD ON EXPERIENCE

Welcome to Skytec, a leading certified EASA Design and Production Organisation specialized in aircraft cabin interior modifications. Our company was founded by two business veterans with over 40 years of experience in the industry. We have established ourselves as experts in providing exceptional, tailor made solutions for aircraft cabin interiors.

Our team of highly skilled and experienced professionals is dedicated to providing bespoke solutions to meet the unique requirements of each of our clients. From design and engineering to manufacturing and installation, we are committed to delivering exceptional quality and outstanding customer service every step of the way.

## DESIGN ORGANISATION

- Approval of EASA Minor Changes / Repairs
- EASA Supplemental Type Certificates (STC)
- In-house EASA CVEs
  - Cabin Safety
  - Structures
  - Avionics / Electrical Systems
  - Environmental Control Systems

## PRODUCTION ORGANISATION

- Production under EASA Part 21
- Cabin Interior Parts:
  - Metal
  - Plastics
  - Composite parts
  - Placards
- Exterior Placards and Markings
- Sourcing of surplus parts
- Kitting Services

## PROGRAM MANAGEMENT

- Supplier evaluation & coordination
- Milestone planning & monitoring
- Project risk assessment / change management
- Delivery planning
- MRO coordination
- On-Site support
- Customer representation
- FAI / product acceptance

## QM / AUDITS / TRAINING

- Introduction of Aviation QM systems
- Manuals / Handbooks
- Trainings (Part 21, POA, DOA, EN9100 etc.)
- Aviation experienced auditors for
  - AS/EN 9100/9110 and ISO 9001
  - EASA Part 21J
  - EASA Part 21G
  - EASA Part M
  - EASA Part 145

## GOOD TO KNOW

We offer customized consulting packages from longterm support at fixed rates or small individual packages on a daily/hourly basis.

**Contact us for your tailored solution!**

# QUALITY IS OUR CORE COMPETENCE

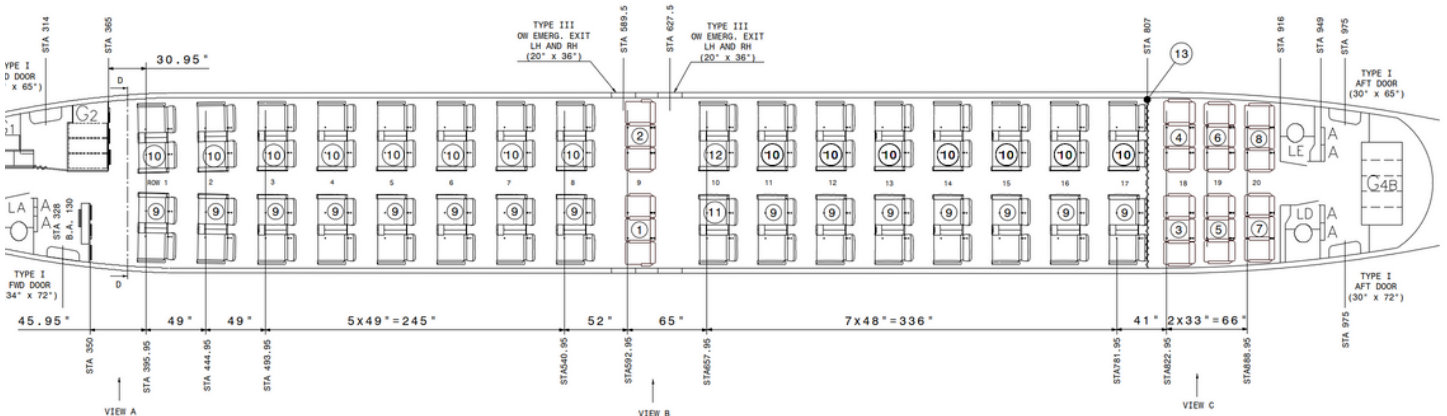

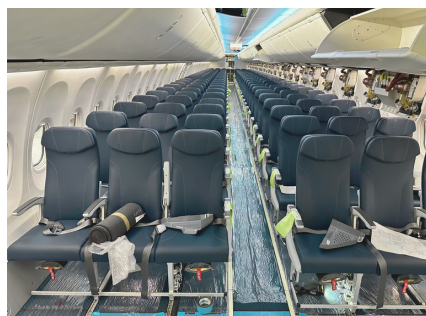

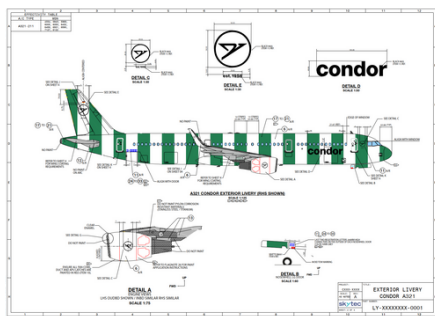

## DESIGN & CERTIFICATION

Skytec is your trusted partner for exceptional engineering & certification services. Our team has extensive experience and expertise in a broad range of disciplines, including Avionics, Cabin Interiors, Electrical Systems, Environmental Control Systems and Structures for CS-25, CS-23 aircraft and CS-27, and CS-29 rotorcraft.

With our large scope, we cover everything from extensive cabin reconfigurations, cargo compartments modifications, interior refurbishment through cabin electronics such as IFE, ISPSS, or WiFi installations down to livery changes, decorative adaptations or registration changes.

We understand that each project is unique and requires a tailored approach. Our team of experienced engineers and designers work closely with you to understand your specific needs and requirements, ensuring that we deliver a solution that exceeds your expectations.

We pride ourselves on our ability to deliver on-time and on-budget. Our team is dedicated to finding cost-effective solutions that meet challenging lead time requirements, while ensuring the highest safety standards and regulatory compliance.

- ### CORE COMPETENCIES
- EASA Minor Changes / Repairs
    - Cabin interiors
    - Placards
    - Trim & Finish
  - EASA STC
    - LOPA Changes
    - Cabin Refurbishment
    - IFE / ISPSS
  - AOG Support
  - Third country validations
  - Investigation and design conception
  - Installation design
  - Installation instructions
  - Hardware design

# CRAFTING YOUR DREAMS

## PRODUCTION

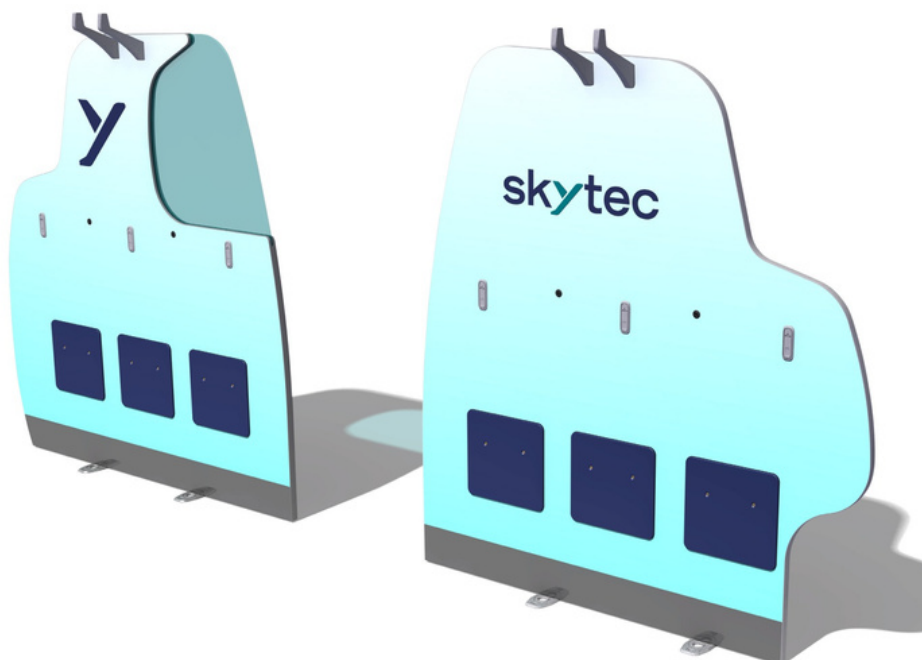

We are specialized in delivering custom interior parts and products that are designed to seamlessly integrate into your aircraft cabin while maintaining the highest quality standards. Our team of experts is dedicated to creating modern and clean designs.

Each of our customers deserves the best, and we are committed to delivering exceptional results on time.

We work closely with a network of qualified suppliers and distributors worldwide to ensure that we can find the optimal solution for your needs.

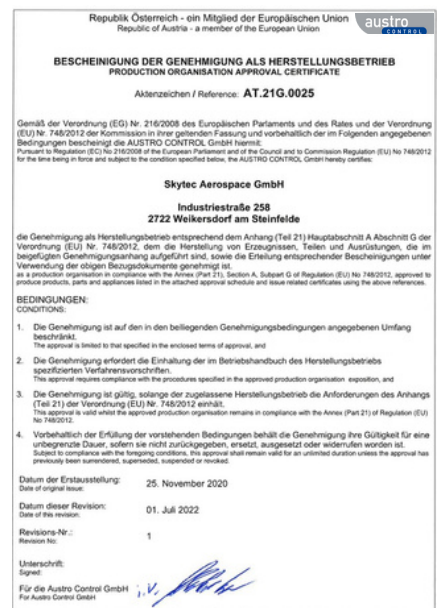

From raw materials to brackets, installation hardware, and placards up to fully custom and individual interior parts we can provide everything you need to complete your project. We also offer pre-assembled electrical harnesses, complete installation kits, OEM parts and even second-hand monuments or passenger seats to meet your specific needs.

All of our products are delivered with authorized release certificates (EASA Form 1). If requested, we also take care of the entire logistic process including shipping to the final destination.

### CORE COMPETENCIES

- Cabin Interior Parts
  - Windscreens
  - Movable Class Dividers
- Interior / Exterior Placards
- Temp. Registration Kits
- Metal Parts
  - Brackets
  - Thresholds
- Soft Furnishings
- Kitting Services
- Second hand parts
- EASA Form 1

# BENEFIT FROM OUR EXPERIENCE

## PROGRAM MANAGEMENT

A detailed, elaborated definition and planning of a project is the basis for success, therefore we support you to define clear project objectives and in case we'll find alternative solutions for you. If new hardware is needed, we assist with our production capability or help you to find suppliers. We form an overall milestone plan considering all interfaces, dependencies and potential risks to identify the critical path. Based on your individual approach, we either fully involve you in any processes or we simply manage everything – taking the load off your team. For any questions related to certification, we can assist you too. We support you on-site during the layover to answer technical questions and help solving issues at the MRO.

## QM / AUDITS / TRAININGS

Our qualified auditors assist with the implementation of Aviation Quality and Safety Management Systems and perform internal Audits and Trainings in the field of Initial- & Continuing Airworthiness for Maintenance, CAMO, Design- and Production Organisations as well as AS/EN 9100/9110 and ISO 9001 taking into account Safety Management on the basis of ICAO Annex 19 and relevant EU regulations. We perform individual trainings or coaching for your Management to ensure EASA acceptance, EASA accepted Compliance Verification Engineers (CVE) or Certifying Staff.

## CONSULTING

We offer a wide range of consulting services, customized to your individual requirements. With our know-how and insights into the aviation industry for Design & Production, we will help you to find the most valuable solution, whether it is a specification or feasibility study, a new idea to improve comfort for your passengers and increasing revenue or implementing an Aviation Quality and Safety Management System within your organization.
